

1. Question one is compulsory
2. Attempt any three from Q.2 to Q.6
3. Assume data wherever necessary
4. Figure to the right indicate full marks.

Q.1 Attempt any four of the following

20

- a) Write a note on design of rectangular tank.
- b) State the procedure for spherical shell subjected to an external pressure.
- c) Draw a neat sketch of Pressure vessel showing all the welded category joints.
- d) Write a note agitator and its application.
- e) Write a note on limphet coil jacket

Q.2

a) Calculate the thickness of ellipsoidal head (2:1) for following design data input.

12

Material of construction - SA 515 gr 70

Design Temperature - 400°C

Design Pressure - 20 bar

Inside diameter - 2000 mm

Height - 3000 mm

Corrosion allowance - 1.5 mm

Radiography - Full

Allowable stress - 101 Mpa

Design code - ASME Section VIII, Div 1

8

a) Explain with reference to pressure vessels

- i. Corrosion allowance
- ii. Welded joint efficiency

10

Q.3

- a) State all the names of different ASME sections
- b) Write a note on Design of lug and bracket support.

10

Q.4 a) A propeller operating at 350 rpm speed in a vessel of 1200 mm diameter with following data: Design shaft based on equivalent bending and critical speed. 12

Internal pressure in a vessel	0.3 N/mm ²
Specific gravity of liquid in vessel	1.1
Diameter of agitator	300 mm
Power number	0.9
Overhang of shaft from bearing support	1500 mm
Shaft material	Stell
Permissible shear stress	50 N/mm ²
Elastic limit in tension	250 N/mm ²
Modulus of elasticity	2×10^5 N/mm ²

b) State the various types of baffles used in agitator and draw a neat sketch of each. 8

Q.5 b) A cylindrical storage tank with open top has following data. 10

Tank diameter	20 m
Tank height	12 m
Density of liquid	1000 kg/m ³
Permissible stress	165 N/mm ²
Modulus of elasticity	2×10^5 N/mm ²
Corrosion allowance	2 mm
Material of construction	Carbon steel
Density of MOC	7850 kg/m ³

Design

- i. Shell plate thickness at various height.
- ii. Wind girder

a) Discuss with reference to vessel support 10

1. Base plate,
2. Skirt bearing plate 20

Q.6 Attempt any four

- a) State the types of opening used in pressure vessel and explain any one.
- b) Classify agitator
- c) Draw shell and tube heat exchanger showing all the components..
- d) Write a note on gasket selection and design.
- e) Explain Process Data Sheet and PFD
