UNIVERSITY OF MUMBAI

Revised syllabus (Rev- 2016) from Academic Year 2016 -17 Under

FACULTY OF TECHNOLOGY

Production Engineering

Second Year with Effect from AY 2017-18 Third Year with Effect from AY 2018-19 Final Year with Effect from AY 2019-20

As per **Choice Based Credit and Grading System** with effect from the AY 2016-17

Co-ordinator, Faculty of Technology's Preamble:

To meet the challenge of ensuring excellence in engineering education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. In line with this Faculty of Technology of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty of Technology, University of Mumbai, in one of its meeting unanimously resolved that, each Board of Studies shall prepare some Program Educational Objectives (PEOs) and give freedom to affiliated Institutes to add few (PEOs). It is also resolved that course objectives and course outcomes are to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. It was also resolved that, maximum senior faculty from colleges and experts from industry to be involved while revising the curriculum. I am happy to state that, each Board of studies has adhered to the resolutions passed by Faculty of Technology, and developed curriculum accordingly. In addition to outcome based education, semester based credit and grading system is also introduced to ensure quality of engineering education.

Choice based Credit and Grading system enables a much-required shift in focus from teacher-centric to learner-centric education since the workload estimated is based on the investment of time in learning and not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. University of Mumbai has taken a lead in implementing the system through its affiliated Institutes and Faculty of Technology has devised a transparent credit assignment policy and adopted ten points scale to grade learner's performance. Credit assignment for courses is based on 15 weeks teaching learning process, however content of courses is to be taught in 12-13 weeks and remaining 2-3 weeks to be utilized for revision, guest lectures, coverage of content beyond syllabus etc.

Choice based Credit and grading system is implemented from the academic year 2016-17 through optional courses at department and institute level

Dr. S. K. Ukarande Co-ordinator, Faculty of Technology, Member - Academic Council University of Mumbai, Mumbai

Chairman's Preamble:

Engineering education in India is expanding and is set to increase manifold. The major challenge in the current scenario is to ensure quality to the stakeholders along with expansion. To meet this challenge, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education and reflects the fact that in achieving recognition, the institution or program of study is committed and open to external review to meet certain minimum specified standards. The major emphasis of this accreditation process is to measure the outcomes of the program that is being accredited. Program outcomes are essentially a range of skills and knowledge that a student will have at the time of graduation from the program. In line with this Faculty of Technology of University of Mumbai has taken a lead in incorporating the philosophy of outcome based education in the process of curriculum development.

As the Chairman, Board of Studies in Mechanical Engineering of the University of Mumbai, I am happy to state here that, the Program Educational Objectives of the Undergraduate Program in Production Engineering, which comes under the same board, were finalized during the multiple brain storming sessions, which was attended by more than 25 members from different affiliated Institutes of the University. They are either Heads of Departments or their senior representatives from the Department of Production Engineering. The Program Educational Objectives finalized for the undergraduate program in Production Engineering are listed below;

- 1. To prepare the Learner with a sound foundation in the mathematical, scientific and engineering fundamentals related to Manufacturing and its strategies.
- 2. To motivate the Learner in the art of self-learning and to use modern tools for solving real life problems.
- 3. To inculcate a professional and ethical attitude, good leadership qualities and commitment to social responsibilities in the Learner's thought process.
- 4. To prepare the learner to face industrial challenges through practical exposure in an industrial environment.
- 5. To prepare the Learner for a successful career in Indian and Multinational Organizations.

In addition to Program Educational Objectives, for each course of the program, objectives and expected outcomes from a learner's point of view are also included in the curriculum to support the philosophy of outcome based education. I strongly believe that even a small step taken in the right direction will definitely help in providing quality education to the major stakeholders.

Dr. S. M. Khot

Chairman, Board of Studies in Mechanical Engineering, University of Mumbai

University of Mumbai, B. E. (Production Engineering), Rev 2016

Course Code	Course Name	Credits
PEC701	Industrial Training and Project	20

- 1. To correlate with the lessons learnt in theory and actual practices followed in the industries.
- 2. To give exposure to an industrial environment/discipline.
- 3. To familiarize with the need for a coordinated effort of various persons at different levels in different departments for achieving the set goals and targets.

Outcomes: Learner will be able to...

- 1. Demonstrate managerial skills.
- 2. Identify the size and scale of operations in Industry.
- 4. Apply the knowledge in problem solving.
- 5. Demonstrate an understanding of various constraints in industry
- 6. Demonstrate the scope, functions and job responsibilities in various departments of an organization.
- 7. Develop a positive attitude while dealing in professional manner.

Guidelines for Evaluation/Assessment

The total duration for each presentation shall be maximum 30 minutes, inclusive of 20 minutes for presentation and 10 minutes for discussion. 50 marks each for stage I and stage II to be awarded based on the points furnished below and as per the discretion of the internal project guide.

1. Contents of the presentation.

- 2. Presentation skills.
- 3. Interest taken, personal involvement and contribution.
- 4. Headway/progress made in the project execution.

Evaluation/Assessment of the Term Work

1. Introduction, Acknowledgements, references.	
2. Company background/ activities.	10
3. Training areas / Training details.	
4. Synopsis / Abstract of the Project.	10
5. General presentation, neatness and accuracy of the data furnished.	15
6. Technical contents of the report with data / observations, graphs, drawings, etc.	25
7. Quality of work carried out and details furnished based on personal	30
Observations/involvement.	
8. Results/ Conclusion.	10

Total - 100

Note: Report shall be prepared using University of Mumbai approved Guidelines, as applicable.

Course Code	Course Name	Credits
PEC801	Fluid Power Automation	04

- 1. To familiarize with the basic concepts of industrial automation.
- 2. To acquaint with the concept of low cost automation with pneumatic and hydraulic systems.
- 3. To familiarize with the elements of electrical control systems.
- 4. To acquaint with the concepts related to fluid power.

Outcomes: Learner will be able to...

- 1. Apply automation techniques in small manufacturing set-ups.
- 2. Illustrate the working principles of fluid power accessories like pumps, motors.
- 3. Analyse pneumatic and hydraulic circuits of medium complexity.
- 4. Illustrate the working of control and regulation elements used in pneumatic and hydraulic circuits.
- 5. Demonstrate the use of electrical and electronics control in pneumatic and hydraulic circuits.
- 6. Analyse the benefits and challenges of Digital Hydraulics.

Module	Contents	Hrs.
01	Introduction to Fluid Power Automation: Definition; Automation in production systems; Automation principles and strategies; Levels of automation; Types of automation; Benefits and Impact of Automation on Manufacturing and Process Industries. Hydraulic & Pneumatic Comparison – ISO symbols for fluid power elements, Hydraulic, pneumatics – Selection criteria.	08
02	Fluid Power Generating/Utilizing Elements Hydraulic pumps and motor, gears, vane, piston. Pumps & motors- selection and specification-Drive characteristics – Linear actuator – Types, mounting details, cushioning – power packs – construction. Reservoir capacity, heat dissipation, accumulators and their types. Applications of Accumulator circuits. Standard circuit symbols, circuit (flow) analysis. Different types of compressors and Actuators in Pneumatics, their applications and use of their ISO symbols.	06
03	Control And Regulation Elements Hydraulic and pneumatic direction, flow and pressure control valves. Methods of actuation, types, sizing of ports – pressure and temperature compensation, overlapped and under lapped spool valves – operating characteristics-electro hydraulic and electro-pneumatic servo valves- different types-characteristics and performance. Difference between Servo and Proportional hydraulic valve.	06
04	 Circuit Design Basic Hydraulic Circuits: Meter in, meter out and Bleed off circuits; Intensifier circuits, Regenerative Circuit, Counter balance valve circuit and sequencing circuits. Pneumatic Circuit Designing: Design of Pneumatic sequencing circuits using Cascade method and Shift register method (up to 3 cylinders). 	12

05	Sensors and Transducers: Performance Terminology; Displacement, position and Proximity Sensors; Velocity and Motion Sensors; Force and Fluid Pressure Sensors; Liquid level and Flow sensors; Temperature and light Sensors; Control of stepper motors.	04
06	Electro Pneumatics & Electronic Control Of Hydraulic and Pneumatic Circuits: Design of Electro-Pneumatic Circuits using single solenoid and double solenoid valves; with and without grouping; Design of Pneumatic circuits using PLC Control (ladder programming only) up to 2 cylinders, with applications of Timers and Counters and concept of Flag and latching. Digital Hydraulics: Definition & Introduction, Digital vs. analog hydraulic control, different ways to realize motion control with on/off valves, Benefits and challenges of digital Hydraulics, Application case studies.	12

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

- 1. Question paper will comprise of total six questions, each carrying 20 marks
- 2. Question 1 will be compulsory and should cover maximum contents of the curriculum
- 3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 4. Only Four questions need to be solved

PEC802	Industrial Engineering and Human Resource	04
	Management	

- 1. To familiarize with the practices of industrial engineering and human resource management.
- 2. To familiarize with the concepts of strategic objectives, optimization of human resource potential and enhancing of human effectiveness.

Outcomes learner will be able to...

- 1. Apply different industrial engineering principles for productivity enhancement.
- 2. Design integrated systems in industrial engineering.
- 3. Develop a concept in identifying, planning, and deployment of man power.
- 4. Develop an inter personal and soft skills.
- 5. Identify the training needs of employs at different levels.
- 6. Analyze legal aspects of employment

	Module	Contents	Hrs
		1.1 Introduction to Industrial Engineering (IE) :	
		Definition, History and Development of IE, Present Scenario of IE,	
		Contributions to IE, Activities and approaches of IE, Objectives and Functions	
		of IE.	
		Productivity:	
		Definition, Productivity in Enterprise, Task of Management, Productivity of	
		Materials, Land, Building, Machine and Power. Measurement of Productivity,	
		Factors affecting productivity, Productivity Improvement likes 5s, Poka-Yoke,	
		Kaizen, Kanban, Quality Improvement Techniques like QFD, FMEA, Ishikawa	
		diagram, SMED	
	01	1.2 Method Study:	14
	01	Objectives and procedure for methods analysis, Recording techniques, Micro	14
		motion and macro-motion study: Principles of motion economy, Normal work	
		areas and work place design.	
.4		1.3 Work Measurement:	
/		Objectives, Work measurement techniques - time study, work sampling, pre-	
		determined motion time standards (PMTS) Determination of time standards.	
		Observed time, basic time, normal time, rating factors, allowances, and standard	
		time, Maynard's Operation Sequence Technique (MOST).	
		1.4 Job Evaluation and Wage Plan:	
		Objective, Methods of job evaluation, job evaluation procedure, merit rating	
	(Real)	(performance appraisal), method of merit rating, wage and wage incentive plans.	
	1 s.	2.1 Value Analysis :	
	2	An Overview Of Value Analysis -Concepts and approaches of value analysis	
		and engineering - importance of value, Function - identity, clarify – analysis	
	02	Evaluation of VE-Evaluation of function, Problem setting system, problem	10
		solving system, value analysis case studies, Effective organization for value	
		work, function analysis system techniques- FAST diagram, Case studies.	
		2.2 Ergonomics :	

r.			
		Introduction: Inter disciplinary nature of ergonomics modern ergonomics human	
		performance – information processing – factors affecting human performance –	
		physical workload and energy expenditure.	
		Workspace Design - Anthropometry – workspace design for standing and seated	
		workers - Arrangements of components within a physical space - Interpersonal	
		aspect of workplace design.	
		Recent Advances and Trends - Legislative trends - Trends in work system	
		design - occupational diseases - Application of Ergonomics' in automobiles.	C
		3.1 Human Resource Management :	
		Introduction to HRM and Management Thought, Historical Developments of	
		HRD, HRD core functions and activities, Virtual HR -E-Recruiting, HRIS-	
	03	Human Resource Information System, E-Training, Human Resource Planning,	06
		Job Analysis, Recruitment and selection, Steps and types of Training and	
		Development, Promotion, Safety and OSHA standards for HR, Differences of	
		HR with Personnel Management, Careers with HR.	
		4.1 Human Behaviour :	
		Definition, Factors affecting human behaviour - Genetics, social norms,	
		creativity, attitude, faith and culture, Group and Group behaviour.	
	04	4.2 Motivation :	06
		Definition, Types of theories and models of motivation, Practical Applications	
		of motivation – Employee morale, Employee recognition programs, Drug abuse,	
		Education, Business and work engagement.	
ľ		5.1 Decision Making :	
		Introduction, Problem Analysis through Decision making tools, Characteristics	
		of decision making, Steps in Rational decision making.	
	o -	5.2 Communication:	0.6
	05	Definition, Types, Historical Developments in communication, Barriers to	06
		communication, Introduction to Bio-communications, Noise and its types,	
		5.3Leadership:	
		Definition, Leadership Theories, Leadership styles, Self – Leadership.	
ľ		Industrial Relations :	
		Introduction, Historic perspective, Industrial Relations today, Collective	
		Bargaining, Trade Unions and Managing Conflicts, Labour Laws and	
	06	Legislations, Importance of Industrial Relations, Objectives of Industrial	08
		Relations, Introduction to Factories Act. Industries Disputes Act. Salary and	
-	-	Wage Fixation and Workman Compensation Act. Employee Grievances.	
		Redressal.

Course	Course Name	
PEC803	Economics, Finance, Accounting and Costing	04

- 1. To acquaint with the concept of Micro and Macro Economics.
- 2. To familiarize with the concepts like comprehend the need, definition, functions and economic significance of financial institutions and markets.
- 3. To familiarize with the concept of Fiscal and Monetary Policy.
- 4. To acquaint with financial statements and Annual Reports of industries.
- 5. To familiarize with the concept of cost records / statements.

Outcomes: Learner will be able to...

- 1. Correlate various micro and macro-economic variables.
- 2. Analyze various market/business strategies.
- 3. Illustrate concept of Economic policies and their implications.
- 4. Demonstrate the roles played by various financial institutions/banks.
- 5. Analyze various accounting and costing practices.
- 6. Select best investment method.

Module	Contents	Hrs.
01	Introduction Definition of Economy, Central problems of an economy: what, how and for whom to produce; concepts of production possibility frontier and opportunity Cost. Economics, its scope and importance. Introduction to Micro and Macro Economics and their comparison.	04
02	 Micro Economics Consumer's Behavior: meaning of utility, marginal utility and law of Diminishing Marginal Utility. Conditions of consumer's equilibrium using marginal utility analysis utility, law of demand and relation between law of demand & law of diminishing marginal utility. Producer's Behavior: law of supply, variation in supply, Types of elasticity of supply. Types of Market: perfect competition, pure competition, Monopoly. 	04
03	 Macro Economics Concept of National Income: Circular flow of income, Distinction between Gross and Net National Income. Different Methods of Measuring National Income, Definition of Money, Functions of Money, Value of Money and Different concepts of Money. Economic Policy: Monetary, Income and Fiscal Policies. Functions of Central Bank, Functions of Commercial Banks credit Creation, Credit Control Methods, Theory of Inflation, Concepts of Inflation, Effects of Inflation and Anti-inflationary policies. 	04

	Financial Environment of Business:	
	Financial Management-Sources of finance-long term and short term finance	
	Working Capital Management:-	
	Concept of working capital management, Cash Conversion Cycle, Management of	
	stock ,overtrading	
	Capital Markets	
04	Primary Market : Basics of capital market mechanism and instruments.	10
	Secondary Market: Basics of stock exchange and their role, Role of SEBI, Role	
	of FIIs, MFs and Investment Bankers .Money Markets: Basics of Mon Mechanism,	
	instruments, and institutions.	
	An Overview of investment Appraisal Methods:	
	NPV method, Payback method, discounted payback period method, IRR, Annual	
	worth method.	
	Accounting Mechanics, Process and system:	
	Introducing Book Keeping and Record Maintenance, The concept of Double entry	
	and fundamental principles, Journal, Ledger, Trial Balance and Final accounts.	
05	Financial Analysis, Ratio Analysis and comparative balance sheet.	12
	Management Accounting:	
	Understanding of Financial Statements (Overview), Interpreting Financial	
	statements (overview).	
	Cost and Management Accounting	
	Introduction to cost, Types of cost, Treatment of Overheads, Unit Costing (Cost	
06	Sheet), Joint Product Costing, Process Costing, Marginal Costing, Cost Volume	16
	Profit Analysis and Decision Making. Budgetary Controls, Standard Costing,	
	concept and Importance of Depreciation and Methods of Depreciation.

PEDLO8011	Product Design and Industrial Marketing	04
Course Code	Course Name	Credits

- 1. To acquaint with various approaches in designing and developing new products.
- 2. To familiarize with various software solutions for designing and developing products.
- 3. To familiarize with modern approaches like concurrent engineering, product life cycle management, robust design, rapid prototyping / rapid tooling, etc.
- 4. To familiarize with characteristics of business markets, buying situations, trends in industrial marketing and relevant industrial strategies.

Outcomes: Learner will be able to...

- 1. Design and develop products right from the conceptual level.
- 2. Demonstrate concept of computer aided product design approach.
- 3. Illustrate various modern approaches like concurrent engineering, product life cycle management, robust design, rapid prototyping / rapid tooling.
- 4. Analyze products based on ergonomics and aesthetic aspects.
- 5. Apply appropriate strategies in industrial marketing.
- 6. Demonstrate various aspects related to Industrial Marketing Communication, Advertising, Sales promotion, Publicity Media Plan.

Module	Contents	Hrs.
01	 1.1. Introduction: Definition of product design, Classification of products, Design by evolution, Design by innovation, Product Mix, Various phases in product development and Design, Morphology of Design, Considerations in product design, Product specifications. 1.2. Conceptual Design: Market research, Generation, Selection and Embodiment of concept, Product Architecture, Customer centric product designing 1.3. Creativity: Role of creativity in problem solving, Vertical and lateral thinking, Brain storming, Synectics, Group working dynamics, Adaptation to changing scenarios in economics, social, cultural and technological fronts, Anticipation of new needs and aspirations. 1.4. Materials: Overview of materials including new generation materials, Tailor made material concepts, Material selection process. 	06
02	 2.1. Design for manufacturing (DFM): Guidelines and Methodology, Producibility requirements, Accuracy and Precision requirements, Strength considerations in Design: Criteria and objectives, Designing for uniform strength, Designing for stiffness and rigidity, Practical ideas for material saving in design - ribs, corrugations, rim shapes, bosses, laminates, etc. 2.2. Design for forged and Cast components, Design for Sheet Metal processed components, powder metallurgical components, Expanded metals and wire forms 	12

		2.3. Designing with plastics: Mechanical behavior, special		
		characteristics and considerations, Design concepts for product		
		features to be manufactured by various production process		
		technologies, Special considerations for designing of		
		components for load bearing applications,		
		2.4. Other DFX Principles : Designs for Maintainability, Safety,		
		Reliability, Sustainable Design		
		2.5. Design for Assembly (DFA): DFA Index. Analysis of assembly		-
		requirements. Standardization. Ease of Assembly and		6
		disassembly. Design for bolted welded and riveted components		
		Design for hinge and snap fit assemblies maintenance		×
		consideration of handling and safety Modular concepts		
		3.1 Product Fragmonics: Anthronometry Environmental		
		conditions thermal noise vibration displays illusions Psycho		
		and psychological aspects in design. Man machine information		
		and psychological aspects in design, Man-machine miormation		
		2.2. Product A actuation Viewal awaren and Form alamenta in contact		
		5.2. Product Aesthetics : visual awareness, Form elements in context		
	02	Introduction to colour and colour as an element in design Colour	0.6	
	03	introduction to colour and colour as an element in design, Colour	06	
		classifications and dimensions of colour, Colour combinations		
		and colour dynamics, interaction / communication of colours,		
		Psychological aspects of colours, generation of products forms		
		with analogies from nature.		
		3.3. Product Graphics: Graphics composition and layout, Use of		
		grids in graphics composition, Study of product graphics and		
		textures.		
		4.1. Value Engineering: Product value and its importance, Value		
		analysis job plan, Steps to problem solving and value analysis,		
		Value analysis tests, Value Engineering idea generation check list,		
		Material and process selection in value engineering, Cost		
	04	reduction, case studies and exercises.	08	
		4.2. Software solutions: Software for drafting, modeling, assembly,		
		detailing, CAM interfacing, Rapid tooling/rapid prototyping, etc.		
		4.3. Modern Applications: Concurrent Engineering, Robust Design,		
		Additive Manufacturing/Rapid Prototyping, Product Life Cycle		
/		Management techniques and application areas.		
/		Introduction to Industrial Marketing, Understanding Industrial		
/		Markets, Nature of Industrial Buying, Industrial Market		
1	05	Segmentation, New Products and Established product strategies,	08	
		Resource based and Value based strategy, Industrial Pricing: Price		
		Determinants, Pricing Policies, Pricing Decisions, Pricing - Value		
		based and Competition based.		
		6.1. Industrial Marketing Channels: Channel participants, Channel		
	V	effectiveness, Marketing logistics, Physical Distribution and		
	07	Marketing Strategy, Value added market channels		
	06	6.2. Industrial Marketing Communication, Advertising, Sales	08	
		promotion, Publicity Media Plan, Integrated Promotion Plan,		
		Industrial Sales force Management, Technical Support for		
		Marketing – customer technical services and feedback.

Course Code	Course Name	Credits
PEDLO8012	World Class Manufacturing	04

- 1. To familiarize with the concepts of Business excellence and competitiveness.
- 2. To acquaint with the business challenges and the future manufacturing competition.
- 3. To acquaint with the current trends of manufacturing scenario at domestic and global level.

Outcomes: Learner will be able to ...

- 1. Illustrate relevance and basics of World Class Manufacturing.
- 2. Co-relate factors of competitiveness and performance measures with respect to bench marking.
- 3. Apply productivity tools for world class manufacturing.
- 4. Demonstrate Human Resource Managerial approaches for value addition.
- 5. Analyze the current Status of Indian Manufacturing scenario.
- 6. Design and develop a roadmap to achieve world class manufacturing status for industries.

ſ	Module	Contents	Hrs.
	01	Historical Perspective World class Excellent organizations–Models for manufacturing excellence: Schonberger, Halls, Gunn and Maskell models, Business Excellence.	06
	02	Benchmark, Bottlenecks and Best Practices Concepts of benchmarking, Bottleneck and best practices, Best performers – Gaining. Competitive edge through world class manufacturing – Value added manufacturing – Value. Stream mapping - Eliminating waste –Toyota Production System – Example.	08
	03	System and Tools for World Class Manufacturing [8hrs] Improving Product & Process Design – Lean Production – SQC, FMS, Rapid Prototyping, PokaYoke, 5-S, 3M, JIT, Product Mix, Optimizing, Procurement & stores practices, Total Productive maintenance, Visual Control.	08
-	04	Human Resource Management in WCM Adding value to the organization– Organizational learning – techniques of removing Root cause of problems–People as problem solvers–New organizational structures. Associates–Facilitators–Teams manship– Motivation and reward in the age of continuous improvement.	06
-	05	Typical Characteristics of WCM Companies Performance indicators like POP, TOPP and AMBITE systems– what is world class Performance –six Sigma philosophies	08
1	06	Indian Scenario Case studies on leading Indian companies towards world class manufacturing – Task Ahead. Green Manufacturing, Clean manufacturing, Agile manufacturing with applications of Timers and Counters and concept of Flag and latching.	12

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

- 1. Question paper will comprise of total six questions, each carrying 20 marks
- 2. Question 1 will be compulsory and should cover maximum contents of the curriculum
- 3. Remaining questions will be mixed in nature (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 4. Only Four questions need to be solved

PEDLO8013	Logistics and Supply Chain Management	04

- 1. To acquaint with the concept of key drivers of supply chain performance and their inter-relationships with strategy.
- 2. To impart analytical and problem solving skills necessary to develop solutions for a variety of supply chain management.
- 3. To acquaint with the design problems and develop an understanding of information technology in supply chain optimization.
- 4. To acquaint with the complexity of inter-firm and intra-firm coordination in implementing programs such as e-collaboration, quick response, jointly managed inventories and strategic alliances.

Outcomes: Learner will be able to:-

- 1. Demonstrate the functional strategy map of supply chain management.
- 2. Design supply chain strategy of a firm.
- 3. Demonstrate concepts and ideas related to Materials management.
- 4. Illustrate various aspects pertaining to logistics for any organization.
- 5. Demonstrate activities of business logistics.
- 6. Use technology to change logistics and supply chain management.

Module	Contents	Hours
01	 Building a Strategic Framework to Analyse Supply Chains Building a Strategic Framework to Analyse Supply Chains Understanding the Supply Chain: What Is a Supply Chain?, The Objective of a Supply Chain, The Importance of Supply Chain Decisions, Decision Phases in a Supply Chain, Process Views of a Supply Chain, Examples of Supply Chains. Supply Chain Performance- Achieving Strategic Fit and Scope: Competitive and Supply Chain Strategies, Achieving Strategic Fit, Expanding Strategic Scope, Obstacles to Achieving Strategic Fit Supply Chain Drivers and Metrics: Drivers of Supply Chain Performance, Framework for Structuring Drivers, Facilities, Inventory, Transportation, Information, Sourcing, Pricing Designing the Supply Chain Network Designing the Supply Chain Network, Designing Distribution Networks and Applications to a business. 	10
02	Applications to e-business: The Role of Distribution in the Supply Chain, Factors Influencing Distribution Network Design, Design Options for a Distribution Network, E-Business and the Distribution Network, Distribution Networks in Practice.	06
03	Designing and Planning Transportation Networks Transportation in a Supply Chain: The Role of Transportation in a Supply Chain, Modes of Transportation and Their Performance Characteristics, Transportation Infrastructure and Policies, Design Options for a Transportation Network, Trade- Offs in Transportation Design, Tailored Transportation, The Role of IT in Transportation, Risk Management in Transportation, Making Transportation Decisions in Practice.	08

	4.1Designing Global Supply Chain Networks	
	Designing Global Supply Chain Networks, The Impact of Globalization on	
	Supply Chain Networks: The Offshoring Decision: Total Cost, Risk	
	Management in Global Supply Chains, The Basic Aspects of Evaluating Global	
	Supply Chain Design, Evaluating Network Design Decisions Using Decision	
	Trees, Evaluation of Global Supply Chain Design, Decisions Under Uncertainty,	
	Making Global Supply Chain Design, Decisions Under Uncertainty in Practice.	
04	4.2Managing Cross-Functional Drivers in a Supply Chain	08
	Sourcing Decisions in a Supply Chain: The Role of Sourcing in a Supply Chain,	5
	In-House or Outsource, Third and Fourth-Party Logistics Providers, Supplier	
	Scoring and Assessment, Supplier Selection-Auctions and Negotiations,	
	Contracts, Risk Sharing, and Supply Chain Performance, Design Collaboration,	*
	The Procurement Process, Sourcing Planning and Analysis, The Role of IT in	
	Sourcing, Risk Management in Sourcing, Making Sourcing Decisions in	
	Practice.	
	IT in a Supply Chain	
	Information Technology in a Supply Chain: The Role of IT in a Supply Chain,	
05	The Supply Chain IT Framework, Customer Relationship Management, Internal	07
05	Supply Chain Management, Supplier Relationship Management, The	UO
	Transaction Management Foundation, The Future of IT in the Supply Chain,	
	Risk Management in IT, Supply Chain IT in Practice	
	Coordination in a Supply Chain	
	Coordination in a Supply Chain: Lack of Supply Chain Coordination and the	
	Bullwhip Effect, The Effect on Performance of Lack of Coordination, Obstacles	
	to Coordination in a Supply Chain, Managerial Levers to Achieve Coordination,	
	Building Strategic Partnerships and Trust Within a Supply Chain, Continuous	
06	Replenishment and Vendor-Managed Inventories, Collaborative Planning,	08
	Forecasting, and Replenishment (CPFR), The Role of IT in Coordination,	
	Achieving Coordination in Practice. Reverse logistics: Reasons, Role, Activities;	
	RFID systems: Components, Applications, Implementation; Lean supply chain,	
	Implementation of Six Sigma in supply chain, Basics of Green supply chain	
	management.	

Internal Assessment for 20 marks:

Course Code	Course Name	Credits
PEDLO8014	Plant Engineering	04

- 1. To acquaint with various plant organizing functions.
- 2. To familiarize with various type of maintenance work and systems in a plant.
- 3. To acquaint with various methods of pollution control, noise control and vibration control. on
- 4. To acquaint with concept of energy conservation programs.

Outcomes:-Learner will be able to...

- 1. Illustrate various organization of plant engineering.
- 2. Apply of heating, ventilating and air conditioning system.
- 3. Demonstrate process of material handling systems in plant engineering
- 4. Demonstrate various operational and safety aspects.
- 5. Illustrate concepts of pollution control, noise control, vibration control and fire control methods.
- 6. Apply energy conservation programs.

Module	Contents	Hours
01	Organization of the plant engineering function, he role of first line supervisor, design of plant engineering organization-Classification of maintenance work, computer based maintenance, predictive maintenance, reliability centered maintenance, integrated system. Standalone system. Ventilation and air-conditioning, Sanitation control and housekeeping. Electric system management, Reliability, power quality, utility rate structures.	10
02	Producer Gas Plants-operation and safety aspects in P.G. Compressor and Oxygen plants.	04
03	 Applications of heating, ventilating and air conditioning system- General considerations, occupancies, exhaust systems. Communication and computer networks- The network, hardware, backing up data. peripherals, environment, security 	04
04	 Material handling Planning Solving material handling problems, justification of material handling projects. Material handling containerization -AS and RS (Automatic Storage and Retrieval System)-AGV and robotics-piping system design and components- Pollution control Regulatory requirement, emission safety, emission control methods and plant safety Lighting Determining lighting criteria, determining light source requirement, utilize multiple designs 	10
05	Noise control – Occupational noise control limits, occupational hearing conservation requirement, Human response to noise, control of plant noise, computer modelling, measurement and instrumentation. Vibration control-	10

	Characterization of vibrations, causes of vibrations, effects of vibration, the need	
	for vibration control, vibration control strategy.	
	Fire control	
	The nature of fire, The plant fire problem: causes and prevention, plant fire	
	hazards, fire hazards of materials, design and construction for fire safety, fire	
	detection and alarm system, special agent suppression systems, portable fire	
	extinguishers, codes and standards.	
	Energy Conservation-	C
	Energy conservation program preparation. Determining energy conservation	
06	potential, refining the problem, implementation, savings maintenance.	10
	Lubrication and corrosion-	10
	Synthetic and solid lubricants -lubrication systems - causes and control	
	deterioration - paints and protective coatings	

Internal Assessment for 20 marks:

Course Code	Course Name	Credits
PEDLO8015	Process Control and Instrumentation	04

- 1. To familiarize with various measuring instruments and methods of measurements of important process parameters.
- 2. To acquaint with the principles of automation and automatic process control techniques.
- 3. To familiarize with concepts of measurement and automatic process control related to specific industrial applications.

Outcomes: Learner will be able to...

- 1. Illustrate basic principles of working and error estimation of measuring instruments.
- 2. Select various measuring instruments.
- 3. Illustrate basics of automatics control and control modes.
- 4. Measure process parameters.
- 5. Apply automatic process control approaches to various industrial application areas.
- 6. Identify Industrial applications of process control techniques.

Module	Contents	Hrs
01	Basics of instruments: Types of measurements, classification, types of measuring instruments, constructional and design features, performance characteristic. Generalised configuration of a measurement systems.	05
02	 Measurements of process parameters (Temperature and pressure): 2.1 Temperature measurement: sensors for temperature measurement – Thermistor, Thermocouple and Resistance Temperature Detectors. Solid and liquid expansion thermometers, Radiation and optical pyrometers. 2.2 Pressure measurement: pressure sensors, Elastic Electrical and Inductance type pressure transducers, Barometer, Manometers – Types and comparisons, Differential pressure measurement, vacuum measurement, Pressure gauges – Types. 	10
03	 Measurements of Process Parameters (Level, Flow, and Humidity) 3.1 Level and density Measurement: Direct Level measurement – Point contact, Gauge glass and buoyancy methods. Indirect Level measurement – Hydrostatic, capacitance, radiation and ultrasonic methods. Density measurement techniques. 3.2 Flow measurement: Flow measuring methods, head flow measurements – Orifice plate, Venturi-tube flow nozzle and pitot tubes- applications and sources of errors. Variable area flow measurement – Rotameter and valve type area meter, Electromagnetic flow meter, Flow integrators, Positive displacement flow meters – types, Velocity Flow meter and turbine flow meters. 3.3 Humidity measurement: measurement of humidity using psychometer and hygrometer (Mechanical and Electrical types), Moisture measurement in solids. 	10

04	Automatic process control: Fundamentals of automatic process control, Process dynamics – process response, process time tags, types of lags- capacitance, resistance, transportation and inertia lag, Process classification – first order and second order systems.	06
05	 Automatic control and control modes: 5.1 Automatic control: block diagram, feedback and feedback forward control, servo and regulator operations, Controlling of batch and continuous process. 5.2 Control modes: classification of controllers, ON-OFF control; Proportional (P) control; Integral (I) control; Differential (D) control; P & I control; P & D control; P, I & D control, Selection of control modes. ISA (instrumentation society of America) codes and flow-plan symbols; Typical instrumentation symbols. 	10
06	Industrial Application of process control: Examples of control systems used for measurement and control of – Temperature, Pressure, Level and Flow. Ratio Control and Cascade control. Alarm systems and indications, Basic concepts of telemetry and telecontrol of operations.	07

Course Code	Course Name	Credits
ILO 8021	Project Management	03

- 1. To familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques.
- 2. To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.

Outcomes: Learner will be able to...

- 1. Apply selection criteria and select an appropriate project from different options.
- 2. Write work break down structure for a project and develop a schedule based on it.
- 3. Identify opportunities and threats to the project and decide an approach to deal with them strategically.
- 4. Use Earned value technique and determine & predict status of the project.
- 5. Capture lessons learned during project phases and document them for future reference

Module	Detailed Contents	Hrs
	Project Management Foundation: Definition of a project. Project Vs Operations, Necessity of project management, Triple	
01	constraints, Project life cycles (typical & atypical) Project phases and stage gate process.	5
	Role of project manager, Negotiations and resolving conflicts, Project management in various organization structures. PM knowledge areas as per Project Management Institute	C
	(PMI)	
	Initiating Projects:	
	How to get a project started, Selecting project strategically, Project selection models	-
02	(Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project	6
	sponsor and creating charter; Project proposal. Effective project team, Stages of team	
	development & growth (forming, storming, norming &performing), team dynamics.	
	Work Preakdown structure (WPS) and linear responsibility short. Interface	
03	Coordination and concurrent anginaging. Project cost estimation and budgeting. Top	Q
03	down and bottoms up budgeting. Notworking and Scheduling techniques DEPT CDM	0
	GANTT chart Introduction to Project Management Information System (PMIS)	
	Planning Projects:	
	Crashing project time Resource loading and levelling Goldratt's critical chain Project	
	Stakeholders and Communication plan	
04	Risk Management in projects: Risk management planning. Risk identification and risk	6
	register, Qualitative and quantitative risk assessment, Probability and impact matrix. Risk	
	response strategies for positive and negative risks	
1	5.1 Executing Projects:	
	Planning monitoring and controlling cycle, Information needs and reporting, engaging	
	with all stakeholders of the projects, Team management, communication and project	
	meetings	
05	5.2 Monitoring and Controlling Projects:	8
	Earned Value Management techniques for measuring value of work completed; Using	
	milestones for measurement; change requests and scope creep, Project audit	
	5.3 Project Contracting	
	Project procurement management, contracting and outsourcing,	

	6.1 Project Leadership and Ethics:	
	Introduction to project leadership, ethics in projects, Multicultural and virtual projects	
	6.2 Closing the Project:	
06	Customer acceptance; Reasons of project termination, Various types of project	6
VO	terminations (Extinction, Addition, Integration, Starvation), Process of project	0
	termination, completing a final report; doing a lessons learned analysis; acknowledging	
	successes and failures; Project management templates and other resources; Managing	
	without authority; Areas of further study.	

Internal Assessment for 20 marks:

ILO 8022	Finance Management	03

- 1. Overview of Indian financial system, instruments and market
- 2. Basic concepts of value of money, returns and risks, corporate finance, working capital and its ions management
- 3. Knowledge about sources of finance, capital structure, dividend policy

Outcomes: Learner will be able to...

- 1. Understand Indian finance system and corporate finance
- 2. Take investment, finance as well as dividend decisions

Module	Detailed Contents	Hrs
	Overview of Indian Financial System: Characteristics, Components and Functions of	
	Financial System.	
	Financial Instruments: Meaning, Characteristics and Classification of Basic Financial	
	Instruments — Equity Shares, Preference Shares, Bonds-Debentures, Certificates of	
01	Deposit, and Treasury Bills.	06
	Financial Markets: Meaning, Characteristics and Classification of Financial Markets —	
	Capital Market, Money Market and Foreign Currency Market	
	Financial Institutions: Meaning, Characteristics and Classification of Financial	
	Institutions — Commercial Banks, Investment-Merchant Banks and Stock Exchanges	
	Concepts of Returns and Risks: Measurement of Historical Returns and Expected	
	Returns of a Single Security and a Two-security Portfolio; Measurement of Historical	
02	Risk and Expected Risk of a Single Security and a Two-security Portfolio.	06
•=	Time Value of Money: Future Value of a Lump Sum, Ordinary Annuity, and Annuity	00
	Due; Present Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Continuous	
	Compounding and Continuous Discounting.	
	Overview of Corporate Finance: Objectives of Corporate Finance; Functions of	
	Corporate Finance—Investment Decision, Financing Decision, and Dividend Decision.	
03	Financial Ratio Analysis: Overview of Financial Statements—Balance Sheet, Profit and	09
	Loss Account, and Cash Flow Statement; Purpose of Financial Ratio Analysis; Liquidity	
1 a 2 8	Ratios; Efficiency or Activity Ratios; Profitability Ratios; Capital Structure Ratios; Stock	
	Market Ratios; Limitations of Ratio Analysis.	
	Capital Budgeting: Meaning and Importance of Capital Budgeting; Inputs for Capital	
	Budgeting Decisions; investment Appraisal Criterion—Accounting Rate of Return,	
	Payback Period, Discounted Payback Period, Net Present Value(NPV), Prolitability	
04	Working Conital Management: Concents of Magning Working Conital: Importance of	10
	Working Capital Management: Easters Affecting on Entity's Working Capital Needs:	
	Fortimation of Working Capital Paguiraments: Management of Inventories: Management	
1	of Receivables: and Management of Cash and Marketable Securities	
	Sources of Finance: Long Term Sources—Equity Debt and Hybrids: Mezzanine	
	Finance: Sources of Short Term Finance—Trade Credit Bank Finance Commercial	
	Paper: Project Finance.	
05	Capital Structure: Factors Affecting an Entity's Capital Structure: Overview of Capital	05
	Structure Theories and Approaches— Net Income Approach. Net Operating Income	00
	Approach; Traditional Approach, and Modigliani-Miller Approach. Relation between	
	Capital Structure and Corporate Value; Concept of Optimal Capital Structure	

Internal Assessment for 20 marks:

Course Code	Course Name	Credits
ILO8024	Human Resource Management	03

- 1. To introduce the students with basic concepts, techniques and practices of the human resource management
- 2. To provide opportunity of learning Human resource management (HRM) processes, related with the functions, and challenges in the emerging perspective of today's organizations
- 3. To familiarize the students about the latest developments, trends & different aspects of HRM
- 4. To acquaint the student with the importance of inter-personal & inter-group behavioural skills in an organizational setting required for future stable engineers, leaders and managers

Outcomes: Learner will be able to...

- 1. Understand the concepts, aspects, techniques and practices of the human resource management.
- 2. Understand the Human resource management (HRM) processes, functions, changes and challenges in today's emerging organizational perspective.
- 3. Gain knowledge about the latest developments and trends in HRM.
- 4. Apply the knowledge of behavioural skills learnt and integrate it with in inter personal and intergroup environment emerging as future stable engineers and managers.

Module	Detailed Contents	Hrs
01	 Introduction to HR Human Resource Management- Concept, Scope and Importance, Interdisciplinary Approach Relationship with other Sciences, Competencies of HR Manager, HRM functions Human resource development (HRD): changing role of HRM – Human resource Planning, Technological change, Restructuring and rightsizing, Empowerment, TQM, Managing ethical issues 	5
02	 Organizational Behaviour (OB) Introduction to OB Origin, Nature and Scope of Organizational Behaviour, Relevance to Organizational Effectiveness and Contemporary issues Personality: Meaning and Determinants of Personality, Personality development, Personality Types, Assessment of Personality Traits for Increasing Self Awareness Perception: Attitude and Value, Effect of perception on Individual Decision-making, Attitude and Behaviour Motivation: Theories of Motivation and their Applications for Behavioural Change (Maslow, Herzberg, McGregor); Group Behaviour and Group Dynamics: Work groups formal and informal groups and stages of group development, Team Effectiveness: High performing teams, Team Roles, cross functional and self-directed team. 	7
03	 Organizational Structure &Design Structure, size, technology, Environment of organization; Organizational Roles & conflicts: Concept of roles; role dynamics; role conflicts and stress. Leadership: Concepts and skills of leadership, Leadership and managerial roles, Leadership styles and contemporary issues in leadership. Power and Politics: Sources and uses of power; Politics at workplace, Tactics and strategies. 	6

	Human resource Planning	
	• Recruitment and Selection process, Job-enrichment, Empowerment - Job-	
04	Satisfaction, employee morale	5
04	• Performance Appraisal Systems: Traditional & modern methods, Performance	5
	Counselling, Career Planning	
	Training & Development: Identification of Training Needs, Training Methods	
	Emerging Trends in HR	
	• Organizational development; Business Process Re-engineering (BPR), BPR as a tool	
	for organizational development, managing processes & transformation in HR.	6
05	Organizational Change, Culture, Environment	6
05	Cross Cultural Leadership and Decision Making: Cross Cultural Communication and	0
	diversity at work, Causes of diversity, managing diversity with special reference to	
	handicapped, women and ageing people, intra company cultural difference in	
	employee motivation	
	HR & MIS: Need, purpose, objective and role of information system in HR, Applications	
	in HRD in various industries (e.g. manufacturing R&D, Public Transport, Hospitals,	
	Hotels and service industries	
	Strategic HRM: Role of Strategic HRM in the modern business world, Concept of	
06	Strategy, Strategic Management Process, Approaches to Strategic Decision Making;	10
	Strategic Intent – Corporate Mission, Vision, Objectives and Goals	
	Labor Laws & Industrial Relations: Evolution of IR, IR issues in organizations,	
	Overview of Labor Laws in India; Industrial Disputes Act, Trade Unions Act, Shops and	
	Establishments Act	

Internal Assessment for 20 marks:

Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

- 1. Question paper will comprise of total six questions, each carrying 20 marks
- 2. Question 1 will be compulsory and should cover maximum contents of the curriculum
- **3.** Remaining questions will be mixed in nature (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
 - Only Four questions need to be solved.

Course Code	Course Name	Credits
ILO8027	IPR and Patenting	03

- 1. To understand intellectual property rights protection system
- 2. To promote the knowledge of Intellectual Property Laws of India as well as International treaty procedures
- 3. To get acquaintance with Patent search and patent filing procedure and applications

Outcomes: Learner will be able to...

- 1. understand Intellectual Property assets
- 2. assist individuals and organizations in capacity building
- 3. work for development, promotion, protection, compliance, and enforcement of Intellectual Property and Patenting

Module	Detailed Contents	Hr
01	 Introduction to Intellectual Property Rights (IPR): Meaning of IPR, Different category of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Plant variety protection, Geographical indications, Transfer of technology etc. Importance of IPR in Modern Global Economic Environment: Theories of IPR, Philosophical aspects of IPR laws, Need for IPR, IPR as an instrument of development 	05
02	Enforcement of Intellectual Property Rights: Introduction, Magnitude of problem, Factors that create and sustain counterfeiting/piracy, International agreements, International organizations (e.g. WIPO, WTO) active in IPR enforcement Indian Scenario of IPR: Introduction, History of IPR in India, Overview of IP laws in India, Indian IPR, Administrative Machinery, Major international treaties signed by India, Procedure for submitting patent and Enforcement of IPR at national level etc.	07
03	Emerging Issues in IPR: Challenges for IP in digital economy, e-commerce, human genome, biodiversity and traditional knowledge etc.	05
04	Basics of Patents: Definition of Patents, Conditions of patentability, Patentable and non- patentable inventions, Types of patent applications (e.g. Patent of addition etc), Process Patent and Product Patent, Precautions while patenting, Patent specification Patent claims, Disclosures and non-disclosures, Patent rights and infringement, Method of getting a patent	07
05	Patent Rules: Indian patent act, European scenario, US scenario, Australia scenario, Japan scenario, Chinese scenario, Multilateral treaties where India is a member (TRIPS agreement, Paris convention etc.)	08
06	 Procedure for Filing a Patent (National and International): Legislation and Salient Features, Patent Search, Drafting and Filing Patent Applications, Processing of patent, Patent Litigation, Patent Publication, Time frame and cost, Patent Licensing, Patent Infringement Patent databases: Important websites, Searching international databases 	07

PEL801	Fluid Power Automation Laboratory	01

- 1. To familiarize with software based pneumatics, electro-pneumatics and PLC circuits' simulation.
- 2. To familiarize with setup and execution of pneumatics, electro-pneumatics and PLC circuits on an experimental kit.

Outcomes: The learner will be able to...

- 1. Design & Simulate Pneumatic, Electro-Pneumatic and PLC based circuits on any compatible software.
- 2. Setup and execute Pneumatic, Electro-Pneumatic and PLC based circuits on an experimental kit.
- 3. Design & Simulate PLC based circuits (Ladder Diagram) on any compatible software.
- 4. Set up and execute Pneumatic circuits on an experimental kit.
- 5. Set up and execute electro-pneumatic circuits on an experimental kit.
- 6. Set up and execute PLC based circuit on an experimental kit.

Sr no	Circuit Design/Assignment
01	Designing & Simulation of two pneumatic circuits on any compatible
	software.
02	Designing & Simulation of two electro-pneumatic circuits on any
	compatible software.
03	Designing & Simulation of two PLC based circuits (Ladder Diagram)
	on any compatible software.
04	Two Pneumatic circuits Setup and execution on experimental kit.
05	Two Electro-Pneumatic circuits Setup and execution on experimental
	kit.
06	Two PLC based circuits Setup and execution on experimental kit.

Term Work:

Term work shall consist of exercises listed in the above list

The distribution of marks for term work shall be as follows:

Circuit Simulation		: 10 marks
Circuit Setup and Execution		: 10 marks
Attendance		: 05 marks
	1	.1

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Practical/Oral Exam:

The practical/Oral exam shall consists of the following;		
Circuit Simulation: one problem	: 15 marks	
Circuit Setup and Execution: one problem	: 10 marks	

itions

Course Code	Course Name	Credits		
PEL802	802 Industrial Engineering and Human Resource Management Laboratory			

- 1. To familiarize with the concepts like Design, develop, implement, and improve integrated systems.
- 2. To acquaint with basic philosophy of enhancing effectiveness of the human resource potential of their organization.

Outcomes learner will be able to...

- 1. Apply different industrial engineering principles for productivity enhancement.
- 2. Develop an integrated systems.
- 3. Develop skills in identifying, planning, and deploying of man power.
- 4. Develop inter personal and soft skills.
- 5. Develop skills in identifying training needs of employs at different levels.
- 6. Apply legal aspects of employment.

Sr. No.	List of Assignments (any Five assignments)
1	Exercise on Decision Making process in solving a chosen problem.
2	Exercise on a Case analysis of Human Behavior at work place.
3	Exercise on any one of the Time Measurement techniques.
4	Exercise on Assessment of Leadership Quality.
5	Exercise on a case study on Value Analysis.
6	Exercise on Ergonomic Design of a part / product.
7	Presentation on current scenario of Industrial Relations.

Term Work

Term work shall consist of at least 5 assignments from above list.

The distribution of marks for term work shall be as follows:

Assignments

: 20 Marks

Attendance (Theory and Practical)

: 05 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Oral Examination

- 1. Examiners are expected to evaluate learner's practical understanding of fundamental skills involved in the field of Industrial Engineering as well his/her grasp of the knowledge of Human Resources, being a very crucial and critical resource in modern firms. The oral examination should be conducted broadly based on the practical significance of the syllabus.
- 2. The distribution of marks for oral examination shall be as follows:
- 3. Oral25 marks

PEL803

Course Name Economics, Finance, Accounting and Costing Tutorial

Credits

Objectives:

- 1. To acquaint the students with the concepts of Micro and Macro Economics.
- 2. To enable the students to comprehend the need, definition, functions and economic significance of financial institutions and markets.
- 3. To familiarize the students with the concept of Fiscal and Monetary Policy.
- 4. To acquaint the students with financial statements and Annual Reports of industries.
- 5. To familiarize the students with cost records / statements.

Outcomes: Learner should be able to ...

- 1. Correlate various micro and macro-economic variables.
- 2. Illustrate economic policies and their implications.
- 3. Get familiarized with the roles played by various financial institutions/banks.
- 4. Get exposure to various business strategies.
- 5. Get familiarized with accounting and costing practices.
- 6. Get an exposure to wider intricacies of financial management.

List of Assignments

Sr. No.	List of Assignments
01	An assignment on Micro and Macro Economics.
02	An assignment on Financial Management.
03	An assignment on Job Costing
04	Assignment on Marginal Costing.
05	Assignment on Standard Costing.
06	Assignment on Process Costing.

One assignment each on the above mentioned list of assignments and a Mini Project based on the syllabus in the subject of Economics, Finance, Accounting and Costing. Students have to present the mini project in a group of 3-4. Some areas suggested are as follows:-

- a. Study of annual report and final accounts of a company (currently active) and comment upon the financial aspects of the firm.
 - . Making of a profit & loss statement and Balance sheet of any firm using hypothetical data /actual data and presentation of same.

c. Any other mini project based on the subject syllabus.

Assignments		: 10 Marks
Mini Project		: 10 Marks
Attendance		: 05 Marks
Total		: 25 Marks
