Micrograces sor Archieledor, Q. P. Code: 33408

(2% Hours)

[Total Marks: 75]

N. B.:	(1)	ΔII	questions	are	compulsory

- (2) Make suitable assumptions wherever necessary and state the assumptions made.
- (3) Answers to the same question must be written together.
- (4) Numbers to the right indicate marks.
- (5) Draw neat labeled diagrams wherever necessary.
- (6) Use of Non-programmable calculators is allowed.

1. Attempt any three of the following:

15

- a. How does a Microprocessor work?
- b. Explain the following in terms of Compilers:
 - i) Source code
 - ii) Object code
- c. How is a flip or a latch used as a storage element?
- d. What are the different internal data operations and the register of the 8085 microprocessor?
- e. Describe the various buses in the 8085 microprocessor.
- f. Draw a neat labelled diagram of the 8085 Microprocessor,

2. Attempt <u>any three</u> of the following:

15

- a. Compare the working of an IN and OUT instruction in 8085 microprocessor
- b. Write a short note on Memory mapped I/O techniques.
- c. List and describe the various Arithmetic instructions in the 8085 microprocessor instruction set.
- d. Write an assembly program to subtract the contents of memory location 2041H from 2040H and store the difference in 2050H.
- e. Compare and explain the following instruction:
 - i. LDAX and STAX

2

- ii. JC and JNC
- iii. HLT and NOP

1

f. Explain the working of the instructions XRA A and the ANI FOH.

3. Attempt any three of the following:

15

- a. Write an assembly program for 8085 microprocessor to exchange the contents of memory location 2020H and 2021H
- b. Explain how rotate instructions can be used to check the if the hexadecimal number is odd or an even number.
- c. Calculate the time delay for the 8085-based Microcomputer with 2 MHz clock frequency.

Label	Mnemonics	Operand	T cycle
Co	LXI	В, 2384Н	10
LOOP:	DCX	В	6
X	MOV	A,C	4
	ORA	В	4
	JNZ	LOOP	10/7

- d. Write a program to generate a Square wave of a 500 microsecond delay.
- e. Explain the effect of the POP and PUSH instruction on the Stack Pointer.
- f. List and describe the working of Various Calls and Returns instruction in 8085 microprocessor

Q. P. Code: 33408

13

15

4. Attempt any three of the following:

Write an assembly program for 8085 microprocessor to convert (1111 1111) 2 to its a. BCD equivalent.

b. Explain the following instruction for 8085 microprocessor:-

- DAA
- ii) **XCHG**
- Explain the working of an interrupt in 8085 microprocessor. C. d.
- What is the function of an editor, assembler and loader? e.
- List and describe of files generated after cross assembling f.
- Write a short note on SIM instruction.
- **5**. Attempt any three of the following:
- What are the features of Pentium Processor. a. b.
- List and describe the special Pentium registers C.
- Describe the memory management in Pentium and Pentium pro processors Compare Core i5 and i7 processors. d.
- . e.
- Describe the general SPARC Architecture. f.
- What are the various instruction format in the SPARC Architecture?
